

COURSES

SAFe® for Teams

Establishing team agility for Agile Release Trains

Build the skills needed to become a high-performing team member of an Agile Release Train (ART)—and learn how to collaborate effectively with other teams—by becoming a SAFe® Practitioner (SP).

During this two-day course, you will gain an in-depth understanding of the ART, how it delivers value, and what you can do to effectively perform the role using Scrum, Kanban, and Extreme Programming (XP). You will also learn how to write stories and break down features, plan and execute iterations, and plan together on a cadence within PIs. Finally, you'll learn about the continuous delivery pipeline and DevOps culture, how to effectively integrate with other teams, and what it takes to continuously improve the train.

With SAFe® Practitioner (SP) 6.0 certification

SAFe® for Teams

With SAFe® Practitioner (SP) 6.0 certification

Who will benefit?

The following individuals will benefit from this course:

- Team members who apply Lean and Agile at scale
- All members of an Agile Release Train preparing for launch

Recommended class size and on-site training options

SAFe for Teams is most effective when delivered as an on-site class in a real-world setting.

Recommended minimum class size is all team members on an ART. Maximum class size is 150 students.

This course can be delivered by SAFe® Practice Consultants (SPCs) who have validated their credentials for SAFe for Teams.

What you'll learn

To perform the role of a SAFe® Practitioner (SP), you should be able to:

- Apply SAFe to scale Lean and Agile development in their enterprise
- Know their team and its role on the Agile Release Train
- Know all other teams on the train, their roles, and the dependencies between the teams
- Plan and execute iterations to demonstrate value
- Execute PI Planning
- Integrate and work with other teams on the train

Topics covered

- Introducing the Scaled Agile Framework®
- Building an Agile Team
- Planning and executing the Iteration
- Executing the Planning Interval (PI)

Everyone hearing the same message from the same trainers at the same time was a huge enabler for alignment and a ‘one-team’ culture.”

— Em Cambell-Pretty, Author, *Tribal Unity*

Prerequisites

All are welcome to attend the course, regardless of experience. However, the following prerequisites are highly recommended for those who intend to take the SAFe® Practitioner (SP) 6.0 certification exam:

- Familiarity with Agile concepts and principles
- Awareness of Scrum, Kanban, and XP
- Working knowledge of software and hardware development processes

What you get

Class registration includes:

- Attendee workbook
- Preparation and eligibility to take the SAFe® Practitioner (SP) 6.0 certification exam
- One-year membership to SAFe Studio
- Course certificate of completion

Attendees must attend both days of the course in order to qualify for the exam.

Professional Development Units (PDUs) and Scrum Education Units (SEUs)

- Attendees may be eligible to apply for 15 PDUs toward their continuing education requirements with the Project Management Institute (PMI) for PMP, PgMP, and PMI-ACP certifications
- Attendees may be eligible to apply for SEUs under category C, toward earning or renewing their CSP through Scrum Alliance
